WITH 200 P.S.I. REHUA SERVICE LINE
SINGLE 5/8" OR 3/4" METERED SERVICE
STANDARD INSTALLATION OF

1. All service lines must be accessible at all times.
2. Service connections shall be installed and maintained after the service lines are cut and taped to prevent the possibility of the service lines being damaged.
3. All service lines must be labeled with the name and address of the property owner.
4. The service lines must be protected from damage due to freezing conditions.
5. The service lines must be checked for leaks on a regular basis.
6. The service lines must be insulated to prevent damage due to freezing conditions.
7. The service lines must be installed in accordance with the manufacturer's instructions.
8. The service lines must be tested for leaks before the service is turned on.
9. The service lines must be disconnected from the water supply when not in use.
10. The service lines must be properly drained to prevent the possibility of freezing.

NOTE: All service lines shall be accessible at all times.
